**CUSTOMIZATIONS – BACKGROUND INFORMATION**

Types of Customizations

Customizations are most often done to align with existing medical policy documents. Original MCG criteria may be customized when a separate medical policy document is not appropriate.

In addition to customization in clinical criteria, other changes may be made to MCG care guidelines such as adding references, revising coding, or noting length of stay based on mandates.

Review and Approval of Customizations

The Medical Policy & Technology Assessment Committee (MPTAC) reviews and approves new editions of MCG care guidelines and customizations to revise MCG clinical indications.

Disclaimer

Customized guidelines include a disclaimer at the top of the guideline after the guideline title indicating: *This guideline contains custom content that has been modified from the standard care guidelines and has not been reviewed or approved by MCG Health, LLC.*

Guideline History

Customized guidelines include a “Guideline History” section that provides (1) the date of the Medical Policy & Technology Assessment Committee (MPTAC) meeting review and approval of the customization, and (2) a summary of the customization to the MCG care guidelines.
